ACCESSORY

S.2379
RECESSED HOUSING (for installation in masonry)

Dim. 75 x 74 x 3015mm To correctly install the standard luminaire into brick walls or in masonry ceilings or cast concrete the anodized aluminium recessed housing must used. Unlike the installation in plasterboard where a light effect of more than 3 meters is achievable by connecting the luminaires together, the use of the recessed housing limits the maximum length to 3 meters.
Accessory available in the following colors: Anodized aluminium (cod.13)
