S.2461
SIGNAL REPEATER WIRELESS FOR EBOX DMX

IP66 Wireless extender box is a wireless signal extension, it is not necessary to pair via its factory default setting, greatly ensures its stability and wide controlling area among wireless communication devices, removing the complex cabling procedure, to make it become more easier for new or retrofit installations. Please set up all controller and Ebox converters before adding the wireless repeater boxes. Works with GATEWAY WIFI 106 BOX (S.2465), TOUCH PANEL (S.2451) and with the SIGNAL EBOX CONVERTER (S.2460).
As any other WIFI product, should not be placed in a metal enclosure or next to large metal structure. Metal will effectively block all radio signals which are crucial to the operation of the product.
