ACCESSORY

S.3493
DMX CONTROLLER SET

This DMX system includes a controller (A) and a control unit (B). The controller has a wall fixed base wired to the control unit. With the controller (A) simple sceneries can be programmed and managed. The control unit (B) memorizes and runs the light sceneries generated by the controller (A) through a DMX signal. Moreover it can memorize complex light sceneries created with a computer using a professional DMX software. IP20
